

BootcampPDF

The screenshot shows the top navigation bar with the BootcampPDF logo and links for HOME, CERTIFICATIONS, ABOUT, HOW TO PAY?, and GUARANTEE. On the right, there are icons for a user profile, a shopping cart with a '5' badge, and a search icon. Below the navigation is a hero section with a background image of a glass and steel building facade. The text reads: "BootcampPDF provide valid IT certification exam bootcamp PDF". Below this is a search input field with the placeholder text "Input your exam code ..." and a search icon. Further down, a paragraph states: "BootcampPDF is an excellent IT certification exam bootcamp pdf provider which will help you pass exam 100% for sure. Choosing BootcampPDF bootcamp pdf will be your best action." At the bottom of the hero section are two buttons: "All Products" and "Contact now".

Quality and Value

BootcampPDF Practice Exams are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development - no all vce.

Tested and Approved

We are committed to the process of vendor and third party approvals. We believe professionals and executives alike deserve the confidence of quality coverage these authorizations provide.

Easy to Pass

If you prepare for the exams using our BootcampPDF testing engine, It is easy to succeed for all certifications in the first attempt. You don't have to deal with all dumps or any free torrent / rapidshare all stuff.

Try Before Buy

BootcampPDF offers free demo of each product. You can check out the interface, question quality and usability of our practice exams before you decide to buy.

Exam : **1Y0-203**

Title : Citrix XenApp and XenDesktop
7.15 Administration

Vendor : Citrix

Version : DEMO

NO.1 Which FlexCast delivery model can a Citrix Administrator use to enhance an existing physical desktop deployment?

- A. Published applications
- B. Remote PC access
- C. VM hosted applications
- D. Hosted shared desktop

Answer: B

NO.2 Which Citrix hotfix will a Citrix Administrator install on the virtual desktop OS machines in a XenDesktop environment?

- A. GPCSExt
- B. XDPoshModule
- C. ICAWS
- D. ICATS

Answer: C

NO.3 A Citrix Administrator needs to add a VMware ESXi host as a hosting unit in the XenDesktop. Which three permissions are required by User account to add the VMware ESXi host? (Choose three.)

- A. System.Anonymouxs
- B. System.View
- C. DataStore.Browse
- D. System.Read
- E. DataStore.AllocateSpace
- F. DataStore.FileManagement

Answer: A,B,D

Explanation:

Create a VMware user account and one or more VMware roles with a set or all of the privileges listed below. Base the roles' creation on the specific level of granularly required over the user's permissions to request the various XenApp or XenDesktop operations at any time. To grant the user specific permissions at any point, associate them with the respective role, at the DataCenter level at minimum.

The following tables show the mappings between XenApp and XenDesktop operations and the minimum required VMware privileges.

Add connection and resources

SDK	User Interface
System.Anonymous.System.Read.and System.View	Added automatically. Can use the built-in Read-only role.

NO.4 Scenario: A user is currently accessing three published applications from the same Server VDA. The user has informed the Citrix Administrator that an application is NOT responding.

Using Citrix Director, which option should the administrator choose to resolve the user's issue?

- A. Send the user a message informing them to log off.
- B. Terminate the user's session.

- C. Terminate the hung process.
- D. Reset the user's profile.

Answer: C

NO.5 Which three features require Citrix XML Service Trust to be enabled within a XenDesktop infrastructure? (Choose three.)

- A. Smart Access Authentication
- B. Pass-Through Authentication
- C. SAML Authentication
- D. HTTP Basic Authentication
- E. Smart Card Authentication

Answer: A,B,E

NO.6 Scenario: A Citrix Administrator receives a user complaint that it is taking a long time to load the application when the user logs in the beginning of the workday.

Which feature can the administrator enable to reduce the perceived start time of the user's application?

- A. Session Pre-launch
- B. Session Reliability
- C. Session Linger
- D. Session Sharing

Answer: A

NO.7 What happens to the differencing disk of a Random/Non-Persistent desktop machine following a restart in a XenDesktop 7.1x site running on XenServer?

- A. It will be reset for new use
- B. It will be synchronized with the attached Personal vDisk
- C. It will be updated from the base image
- D. It will be deleted

Answer: C

NO.8 Scenario: A Citrix Administrator is investigating an instability in the system that is causing the Print Spooler service to stop frequently on the XenApp server. The administrator finds printer driver conflicts in the environment.

Which policy can the administrator use to resolve this issue and remove the unwanted printer drivers on the XenApp server?

- A. Automatic Installation of in-box printer drivers
- B. Use only printer model specific drivers
- C. Use universal printing only if requested driver is unavailable
- D. Auto-connect all client printers

Answer: C

NO.9 Which printer tool helps enumerate all printer drivers from a specified Windows machine, including driver-specific information, and allows deletion of unwanted drivers?

- A. Windows Performance Kit
- B. Print Detective
- C. Citrix UPS Print Driver Certification
- D. StressPrinters

Answer: B

NO.10 Users are reporting that they are NOT able to print both sides of a page in a session with a printer capable of double-side printing. How can a Citrix Administrator resolve this issue?

- A. Enable routing of print jobs to the printer.
- B. Restart the Print Spooler service on all XenApp servers.
- C. Change the "printer properties retention" policy to save changes to the user profile.
- D. Install the native drivers of the printer on all XenApp servers.

Answer: D

NO.11 Scenario: A Citrix Administrator needs to configure an Engineer User Group, which has the following requirements:

- * Users need the ability to install applications.
- * Users require personalization and elevated administrator rights.
- * Users engage in resource-intensive work.

Which FlexCast Model can the administrator use?

- A. Hosted VDI (Static/Persistent)
- B. Published Applications
- C. Hosted VDI (Random/Non-Persistent)
- D. VM-Hosted Applications

Answer: D

NO.12 Scenario: A Citrix Administrator is working on a published application. The network connection remains for 100 seconds but is interrupted, and applications become unusable. The session then automatically resumes, and the administrator is able to continue working on the application at the same progress point as before the interruption.

Which policy must have been enabled?

- A. ICA Keep Alive
- B. Session Reliability
- C. Load Management
- D. Auto Client Reconnect

Answer: B
